

# Case Study

## Jones Bros. (Lechate tank)

We were approached by Jones Bros because they had a requirement for a Lechate tank, a specialist tank required on landfill sites etc... to treat the liquids and contaminated water which naturally occurs on such sites.

The problem was they had a specific design which they had drawn up and needed a manufacturer to build the tank to these specifications and not to supply an 'off the shelf' a tank. After studying the drawing we said that there would be no problem with this, agreed a price and have now successfully built and delivered the tank for them.

If you require a bespoke solution to an individual problem then give us a call, we are no ordinary hire company and are always on hand to listen.
